

THANE DIAGNOSTIC & IMAGING CENTRE

ULTRASOUND EXAMINATION REPORT

Patient Name: Imran Shaikh | **Age/Gender:** 36 Yrs / Male

Referred By: Dr. Mohammad Khan (Rural CHC Thane)

Date of Scan: 2026-08-28 | **Scan Type:** Whole Abdomen & Pelvis

FINDINGS:

- **Liver:** Normal size (14.2 cm), smooth contour. Diffuse increase in parenchymal echogenicity consistent with Grade-1 Fatty Liver (Steatosis). No focal lesion.
- **Gallbladder:** Well-distended, normal wall thickness (2.2 mm). No calculi, sludge, or polyps.
- **Pancreas & Spleen:** Normal size and parenchymal echotexture.
- **Kidneys:** Both kidneys normal size and position. Corticomedullary differentiation preserved. No calculus or hydronephrosis.

IMPRESSION:

1. Grade-1 Diffuse Hepatic Steatosis (Fatty Liver).
2. No cholelithiasis, pancreatitis, or intra-abdominal mass.
